1

KOMODO PLATFORM: THE BEGINNING

"Komodo aims at being the new standard for cryptocurrency security and anonymity. Protected by Zcash Zero Knowledge proofs users can make 100% untraceable transactions that are secured by Bitcoin's Petahash computational power, due to Komodo's new delayed Proof of Work (dPoW) consensus mechanism."

Recognising the necessity for decentralised trading, third-party dApp developer James 'jl777' began to develop ways in which to make it a better alternative to trading digital assets on centralised exchanges. In February 2014, he created his first ever project called MultiGateWay (MGW). It was one of the first proxy token decentralised exchanges built on the Nxt blockchain. James 'jl777' Lee posted the initial proposal for the MultiGateWay on 12th February 2014 stating its purpose:

"I want to have a way for everyone to be able to trade cryptos in a decentralised way with minimal amount of trust required."

Over the following six months, the MultiGateWay third-party decentralised application was developed and promoted.

In August 2014, James 'jl777' Lee announced a second project he had been working on called SuperNET to create and issue tokens on the Nxt blockchain. Users were free to trade SuperNET tokens on the NXT Asset Exchange.

In December 2015, an updated version to the Nxt blockchain code base (version 1.7.1) was released. It contained certain changes making the update non-backward compatible with third-party dApps built on previous versions. As a consequence, both the MultiGateWay and SuperNET projects were paralysed. It eventually led James Lee to disavow from the Nxt blockchain and seek out an alternative approach.

BTCD was originally to be the backbone coin of the SuperNET ecosystem, however it was decided to create a new coin by forking Zcash thereby creating Komodo.

Komodo is basically BTCD 2.0 and it is created by the same team (jl777). BTCD has a role to play in Iguana (a SuperNET technology), but in the future Komodo will take over that role. Everything will be moving to Komodo.

You can invest with BTC if you want to, but we also offer a fixed rate of 0.00532074 BTC/BTCD for the BTCD holders.

KOMODO

Very shortly & simply: Komodo is part of a broader project called SuperNET.

- Komodo uses Zcash because SuperNET needs anonymity technology, and Zcash is the best tech. Komodo can be thought as SuperNET's infrastructure coin.

- We developed dPoW so we 1) get better security for Komodo, 2) third party blockchains can use Komodo as an additional security layer, 3) SuperNET can achieve its own vision about independent assetchains.

Komodo = Zcash fork + dPoW + it will leverage from other SuperNET technologies

With experience gained from the inability of the Nxt blockchain developers to respect third-party decentralised application development on their blockchain, James Lee realised that a single-chain platform architecture would never be successful. He recognised the need for third-parties to have their own sovereign blockchain without being constrained to protocol code changes, transaction fee hikes and random operating costs.

A few weeks after disavowing Nxt, James Lee joined the Bitcoin Dark development team as a core developer. At this time, he was also coding material attaining to Iguana and other SuperNET related applications.

On 16th February 2016, a date officially recognised on which Komodo code development began, James Lee issued an open letter stating the need for multi-chain architecture and open-source atomic swap protocol. It is referred to as the 'Blockchain Declaration of Independence' that contains the following:

**"We the asset holders hereby declare our independence
from any single blockchain.**

**An open and jointly developed specification on cross chain atomic asset transfers
will be developed. Any current or future blockchain is invited to join. ...**

**The reality is that everything in crypto trades against BTC. One of the conditions
for cross chain assets is the ability to trade against BTC, preferably native BTC and
not a derivative. I will be working on a reference implementation as a first draft
and look forward to collaborate with all other asset orientated projects.**

**This is an interop standards effort and it needs to be
blockchain agnostic and asset centric."**

This statement serves as the foundational idea for Komodo and introduced ideas, blockchain interoperability and atomic swaps, that very few people were discussing at the time.

Following many months of intensive code development, almost entirely from James Lee, a new project to realise the overall vision of SuperNET was announced on 1st September 2016. As an important part of the broader SuperNET project, a more advanced blockchain was being prepared for eventual launch to solve fundamental problems in the blockchain space, namely security and privacy. An official thread on the crypto renowned Bitcointalk Forum was created by James Lee titled "[ANN][KMD][dPoW] Komodo ICO - Zero Knowledge Privacy Secured by Bitcoin".

Komodo had been born to enhance blockchain technology in terms of privacy and security. The SuperNET developers had been closely following progress of another open-source cryptocurrency called Zcash. As a first step, they decided to fork Komodo from the Zcash testnet (Zcash had not officially launched yet) code base. All privacy protocol code (zero knowledge proofs) would then also be implemented into Komodo. In addition, a new security consensus mechanism had also been innovatively developed called Delayed Proof of Work (see page ... for more detailed information). Komodo was the evolution of Bitcoin Dark (BTD 2.0) and set the course to create an independent blockchain architecture without the imperfections of a single-chain platform model.

Shortly after the Komodo announcement, the SuperNET team was happy to report that most major obstacles had been outcome during intense testing phases. Despite this, there was still a lot more to do. James Lee notified the community that there was nothing to bind him to continuing to develop the Bitcoin Dark code base. Komodo had become the long term cryptocurrency of the SuperNET vision.

5th Sept 2016: <https://news.bitcoin.com/komodo-announces-ico-fund-new-consensus-protocol/>

As initially planned, the team had been busy preparing for the upcoming Komodo ICO (Initial Coin Offering) scheduled to begin on 20th October 2016. The aim had been set to raise as many Bitcoin as possible to be used almost entirely to pay for the BTC transaction fees required to support the notarisation process, hence the delayed proof of work consensus mechanism. Komodo ICO will bring more funds that are necessary to remove all the obstacles there are before we can get a mainstream adoption. Other details presented on 2nd September 2016 to the community were:

- 90 million KMD to be distributed, in proportions yet to be determined, to those who participate in the ICO either with BTC or BTCD.
- 10 million KMD to be allocated to code development, marketing, bounties and other operational activities.
- A fixed initial rate of 0.00532 BTC/BTCD had been calculated by adding 50% to the daily closing price average of August 2016 of the BTCD trading markets.
- In order to simplify the BTCD to KMD swap, a fixed exchange rate of 1.0 BTCD to 0.00532074 BTC was established, meaning that if you send one BTCD you will receive 0.00532074 BTC worth of Komodo. This exchange rate was determined by adding a 50% bonus to the daily closing price average of August.

Besides Komodo code development, James Lee was also developing the backend code for a multi-coin wallet called Iguana. He encouraged interested parties to review it (open-source) by visiting the Github repo github.com/jl777/SuperNET or joining SuperNET Slack #Iguana to follow progress. Other devs were working on the GUI + posting updates.

On 13th September 2016, the first block of the KMD blockchain was successfully mined (see below). From this time, the blockchain was a testnet blockchain until it transitioned to the mainnet on 31st January 2017. It was unknown, at the time, whether it would transition... <https://twitter.com/KomodoPlatform/status/775756690234966017> AND <https://bitcointalk.org/index.php?topic=1605144.msg16245305#msg16245305>

Block #1 (Reward 1,000,000 KMD) September 13th 2016

jl777 has been very active on the Zcash slack during the alpha stages, and tried to help in all possible ways. The vision James has about making crypto go mainstream includes anonymity, so the overall project needs this kind of anonymous technology.

Before BitcoinDark was going to fill this role with teleport and telepathy technology, but Zcash is superior to that technology, and we want to use the best technology. Thus Komodo.

jl777 has great respect for the Zcash team and is impressed by their technology! I don't think they will be directly competing.

All the cryptocurrencies are competing against fiat! It's like a new industry that is gaining attraction. Every project will help each other, and as a whole all projects will benefit.

On 8th Sept 2016, polycryptoblog first KMD BTCTalk thread post: <https://bitcointalk.org/index.php?topic=1605144.msg16189533#msg16189533>

On 16th Sept 2016 <https://themerkle.com/komodo-platform-launches-new-consensus-mechanism/>

On 5th Oct 2016, <https://steemit.com/komodo/@komodoplatform/notary-node-elections> AND Newsletter 2 <https://us14.campaign-archive.com/?u=9f4243304464b76b59152c7be&id=b541465a23>

13th October 2016, Komodo is here!
Join our ICO <https://www.youtube.com/watch?v=7uWvWPu2HPA> AND <https://bitcointalk.org/index.php?topic=1605144.msg16551645#msg16551645>

On 14th Oct 2016, polcryptoblog: JL777 is not doing GUI development, Iguana GUI is being worked on by Boogieman and EasyDex GUI is being worked on by grawalsatinder. He completed his part of the work, now the other developers are working to bring it to the finish line. Coding takes time, and its better to have a project with no/little bugs than to have to issue constant updates to fix bugs in a rushed release. Be patient.

Iguana is not Komodo.

Iguana is a multiwallet where you can store and send multiple different cryptocurrencies, like BTC and KMD.

If you send BTC from your Iguana client it will be send out just like it would from any other bitcoin wallet! Likewise with all the other supported cryptocurrencies.

As soon as the Komodo testnet blockchain launched, the SuperNET developers invited tech savvy individuals from within the crypto space to help test its functionalities and resilience, especially the delayed proof of work (dPoW) consensus mechanism. James Lee, as the lead developer of SuperNET was predominantly responsible for backend Komodo and Iguana coding and the overall roadmap, not for the ICO, GUI progress or other community driven endeavours.

On 11th October 2016, a website <https://komodoelection.com> related to the upcoming notary node elections went live for those interested in becoming a notary node candidate. It was the place to submit profiles including credentials, experience and tech knowledge. All profiles manually approved to avoid risk of spam + approved within 24 hours.

NOTARY NODE ELECTIONS

On 15th October 2016 at 15:00 UTC, the Komodo ICO began... ICO address: 35Rwwc9e2Mj7smFXJ1iXF826cMW3tqfz6x (min amount to invest each time was 0.0777 BTC. Dashboard image: <https://twitter.com/KomodoPlatform/status/787600363062960128> TwinWinNerD is one of the key holders, and he is the CEO of [Bitpanda](#).

Start Date	End Date	#days	Bonus %
15th October 2016	17th October 2016	2	25
17th October 2016	23rd October 2016	6	20
23rd October 2016	30th October 2016	7	15
30th October 2016	6th November 2016	7	10
6th November 2016	13th November 2016	7	5
13th November 2016	20th November 2016	7	0

On 15th Oct 2016, Iguana first GUI release: <https://github.com/SuperNETorg/Iguana-application/releases/tag/v0.1-beta> Audo posted on **Iguana GUI team released the first Iguana beta v0.1 version for advanced users.** We will have to wait a little longer to get an easy install version for the average joe like myself [MORE IGUANA INFO]: <https://bitcointalk.org/index.php?topic=1605144.msg16624856#msg16624856> On 27th Oct 2016, <https://steemit.com/komodo/@komodoplatform/komodo-gui-graphic-user-interface-update>

On 28th October 2016, a talented IT security analyst and software developer called Kadan Stadlemann joined the SuperNET team, or more specifically the Komodo technical team. His first task was doing regular audits on the code base and APIs. Kadan Stadelmann introduced himself:

"Thank you for this exciting opportunity!"

about me: I have worked multiple years in the field of IT-security, network security and network-based software development (relay services, div. detection system, and so on). In the last years i was involved in a few scientific projects. I like pentesting software and network services. First and foremost i love reviewing and securing decentralized software and blockchain-based technologies. I found my calling in this. And i am very proud and feel honored to be part of such exciting projects and milestones in the evolution of IT. The vision behind SuperNET was the motivation for me to be part of this.

Few days ago i did a security audit and source-code review for James and the superNET-org and we discussed many topics and potential enhancements in the general field of crypto-security. I proposed a novel solution which we are now working on. I do not want to reveal more than necessary. So far we are the first and only project to use this technic for the usage with cryptocurrencies. It will ease the usage and provide top level security for the average user with no IT-knowledge.

I thank the superNET team and organisation for this interesting and exciting opportunity."

Also on 28th October 2016, three members of the “not so anonymous” SuperNET team took part in an interview livestreamed on YouTube. The interview was hosted by CoinInterview.com. Satinder Grewal (Technical Expert, GUI Developer), James Brown (Administrative Assistant) and Audo Kowitz (Community Manager) answered questions and discussed why they introduced Komodo (a modified fork of Zcash) to the crypto space. To be exact, the interview lasted 1 hour, 23 minutes and 15 seconds.

On 20th November 2016, the Komodo ICO ended. During the 36 day fundraising period, a total of 2,634.04 BTC had been raised to support the project. Two calculated exchange rates were quickly presented at the time, 1 KMD = 0.00012907 BTC and 1 BTCD = 50.448 KMD. What follows is a table showing how much Bitcoin was raised during the campaign:

Start Date	End Date	BTC Raised	Bonus %
9th October 2016	15th October 2016	500.00	35
15th October 2016	17th October 2016	980.00	25
17th October 2016	23rd October 2016	606.84	20
23rd October 2016	30th October 2016	286.70	15
30th October 2016	6th November 2016	38.18	10
6th November 2016	13th November 2016	21.34	5
13th November 2016	20th November 2016	200.98	0

25th Oct 2016, Audo posted: Job Opportunities in Komodo Team

As we reminder, we are looking to hire a bigger team with the ICO funds. The size of the team depends on how much funding we raise.

If you are interested send a message to contact@komodoplatform.com. Thus far we have gotten a few applications. The job would begin at the end of the ICO.

The skills we are looking for:

- project managers
- GUI devs
- testers for command line API
- windows build specialists
- C devs

We will start to process the applications soon!

16th Nov 2016, Important Roadmap

In late November 2016, the SuperNET team had not yet determined when the notary node election would occur. It was also the case that the time schedule for distributing KMD to ICO investors was still being worked out as the ICO website was being prepared to support Bitcoin Dark deposits.

During the first week of December 2016, two talented developers joined the SuperNET team:

- Mohammed Nazmul Alam (fadedreamz) joined the team on 6th December 2016 as a C developer. He began working full-time for SuperNET. He took over Iguana maintenance including GUI support.
- Mihail Fedorov (kolo) joined the team on 7th December 2016 as a system administrator and notary node expert. He had been one of the most active members on the SuperNET Slack, especially in the #notarynode channel.

On 20th December 2016, after countless enquires about why the distribution of KMD had not begun, the SuperNET team was happy to clarify the situation. They reiterated the fact that the ICO website was still being updated to become as secure and reliable as possible. Audo Kowitz apologised for the delay and posted the following about the website and upcoming Iguana multi-coin wallet release:

"We have been successfully testing the BTCD swap feature through an "ugly GUI". The thing works, and now our other dev is implementing it to the actual ICO website with the pretty GUI. We all hope this is done soon, and things will start moving once it is done.

Regarding the wallets: they are being tested by the team. There are still bugs and issues, so they are not published with easy installers. There have been some alpha releases, and multiple screenshots. The team is working hard to get a fully working GUI with "one-click" install ready for the KMD distribution."

On 5th January 2017, upgrades to the ICO website had been finished to enable BTCD deposits. The team reported that the BTCD swap, notary node elections, GUI wallet release and mainnet launch were not far away.

Other historical events which occurred:

- In August 2016, the official Komodo Twitter account went live.
- On 2nd September 2016, the official Komodo Steemit Blog was created at <https://steemit.com/@komodoplatform> Our 1st Steemit Article]Komodo Has Been Born! <https://steemit.com/bitcoin/@komodoplatform/komodo-has-been-born>
- On 12th September 2016, a bounty to translate the official Komodo Bitcointalk OP into Spanish, Chinese, French, German and Portuguese began. Each successful translation received 0.1 BTC. Within 24 hours, all translation bounties had been reserved. Translation French By @metaphilbert!!
- On 17th September 2016, the Komodo Signature and Avatar campaign began for Bitcointalk users to receive certain amounts of BTC for promoting Komodo on that forum. <https://bitcointalk.org/index.php?topic=1619450.msg16277124#msg16277124> On 5th Oct 2016, it reached its max 250 participants.
- On 23rd November 2016, Audo Kowitz Interviewed: <https://bitcointalk.org/index.php?topic=1605144.msg16970110#msg16970110>
- In December 2016, Komodo was featured in the December 2016 issues of Core Magazine (see image below)
- 18th Dec 2016, <https://letstalkbitcoin.com/blog/post/the-crypto-show-with-eric-lombrozo-of-ciphrex-and-juan-galt-on-komodo>
- 6th Jan 2017, <https://medium.com/@satindergrewal/my-open-letter-to-komodo-investors-5dbab0b0d5cd>

QUESTIONS & ANSWERS

Q: Will BTCD be immediately worth less after Komodo is launched?

A: No! You can buy, sell (trade on exchanges e.g. Poloniex) and swap BTCD for 1 full year.

Q: I missed the Komodo ICO, can I still invest?

A: Yes, you can buy BTCD and swap them within 1 full year for KMD.

Q: How much BTC were raised during the ICO?

A: 2,634,040 BTC

Q: What is the final BTC/BTCD Swap Rate (Base Swap Rate + Extra Bonus)?

A: 0.006511 BTC/BTCD (That's the underlying rate to calculate the BTCD to KMD swap rate)

Q: How many KMD will I get for 1 BTCD and for how long?

A: 1 BTCD = 50.448 KMD is the official announced BTCD to KMD swap rate!

During 1 full year BTCD can be swapped for KMD

Q: What was the KMD price with Bitcoin during the ICO with 0% bonus?

A: 1 BTC = 7,747.9 KMD

KOMODO NEWS

KOMODO PLATFORM GATHERS 2636 BITCOIN

The Komodo Initial Coin Offering period ended two days ago. During this 5 week campaign, the investors gathered 2636.37 Bitcoin in course of 14 years. Out of the 200 coins issued, the Komodo team managed to keep 5% for reveals, not only an overwhelming need for privacy- bounties, which also differs from

driven alternatives within the cryptocurrency space, but also the overall promise that the new delayed Proof of Work protocol and the Komodo Platform offers.

The Komodo Platform offers its users top-notch security features derived from Zcash's Zero Knowledge proofs. These allow users to make private or transparent transactions, according to the requirements of each situation. One of the major differences between Komodo and Zcash are the supply and the way it is issued. While Zcash started from 0 ZEC and will go on to 21 million, until the total supply is mined, Komodo will start with 100 million issued ago. During this 5 week campaign, the investors gathered 2636.37 Bitcoin in course of 14 years. Out of the 200 coins issued, the Komodo team managed to keep 5% for reveals, not only an overwhelming need for privacy- bounties, which also differs from

the Zcash "Founder's Reward" EasyDEX. EasyDEX is a decentralized exchange for cryptocurrencies. Using this tool anyone can exchange coins directly and with liquidity. Users will also be able to transfer fiat assets with the same privacy as

One of the most interesting aspects of Komodo is its novel approach on security, Delayed Proof of Work (dPoW). This protocol allows Komodo to anonymously and in a "recycle" Bitcoin's hashing power by notarizing its blocks on the Bitcoin blockchain. This process is headed by a group of pre selected notary nodes that will be voted on by the community.

Since the beginning of the ICO, the Komodo team has revealed how a series of previously developed projects will form the EasyDEX decentralized around Komodo to build a complete ecosystem.

The Iguana multi wallet will be the hub where users can access the basic features of Komodo and other cryptocurrencies as well as other advanced tools like

MAINNET KOMODO BLOCKCHAIN LAUNCHED

8TH JAN 2017

TO

4TH SEPT 2017

"We have come a long way, as the development of our overall platform began when SuperNET was founded in 2014. Today we have the core tech ready, and we are preparing for launch."

After approximately half a dozen weeks of patience from the community, especially from those who participated in the ICO, the SuperNET team was pleased to announce a launch schedule on 8th January 2017. It was also the day on which the Bitcoin Dark (BTCD) deposit feature on the ICO website at <https://ico.komodoplatform.com> went live. All holders of BTCD, either held on exchanges such as Poloniex or locally in their own wallet clients, were now permitted to transfer their coins ready to receive KMD. All BTCD deposits sent before 15th January 2017 qualified depositors participation in the future REVS asset token distribution. The full launch schedule was posted as follows:

- On 8th January 2017, the Bitcoin Dark deposit feature went live. It was therefore still possible to invest in Komodo even though the ICO ended (1 BTCD = 50.448 KMD and underlying swap rate calculated at 0.006511 BTC/BTCD). The swap would last one full year.
- On 15th January 2017, the snapshot of the Bitcoin Dark blockchain will occur at a yet unknown block number. The first annual notary node election will also commence.
- On 29th January 2017, the first annual notary node election will end.
- On 31st January 2017, the distribution of KMD will begin and the testnet KMD blockchain will transition to the mainnet.

Verify your seed/
passphrase!

Go to the komodo ICO site and make sure the KMD address you see there matches with the seed/
passphrase you have saved. Then make sure you keep it in safe place, and remember that we don't have your seed! You are responsible for your own money, and after the KMD distribution there is no way to undo what is done.

If you lose your seed, you lose your investment.

On 9th Jan 2017,
Newsletter: <https://us14.campaign-archive.com/?u=9f4243304464b76b59152c7be&id=b753e73d6d>

59 NOTARY NODES ELECTED

16 Europe (EU) Notary Nodes

Vanbreuk, Pondsea, NxtSwe, Move-Crypto, durerus, BadAss.Sx, etszombi, rnr, noashh, jeezy, IndéNodes, Kashif ali, crackers, artik123, Peter Farla, titomane

16 North America (NA) Notary Nodes

Juan S. Galt, pondsea, karasugoi, MoveCrypto, Satinder Grewel, IndéNodes, BadAss.Sx, crackers, polycryptoblog, noashh, PTYTrader, rnr, artik123, xrobesx, fullmoon, popcornbag

13 Asia & Russia (AR) Notary Nodes

noashh, MoveCrypto, pondsea, fullmoon, kolo, IndéNodes, rnr, metaphilbert, etszombi, popcornbag, artik123, titomane, Muros

14 Southern Hemi (SA) Notary Nodes

Satinder Grewal, MoveCrypto, pondsea, PTYTrader, BadAss.Sx, fullmoon, IndéNodes, kolo, etszombi, Peter Farla, rnr, crackers, artik123, titomane

On 8th January 2017, two infographics were published to summarise all notary node candidates, their respective node locations and subsidy percentages (see pages 32 and 33).

Delayed for five hours due to technical reasons, the first annual notary node election began on 15th January 2017. All 28 candidates were ready to receive votes from the Komodo community via the ICO website (see image below). Voters had the choice to vote for the most reliable and responsible candidates (one vote for each region). In particular, Jason ‘polycryptoblog’ Brown posted the following to seek votes:

“Hello, Komodo voters! I am polycryptoblog, running as a candidate for a North America notary node. I am an admin assistant at Komodo and help with various tasks around the project including building and running KomodoElection.com!

I have been helping with the testnet since mid-October and have been frequently a part of the notarization efforts to BTC blockchain with over 700 notarizations and more than 8k KMD mined on my single node. I am running for a single spot in the North America geolocation as a native of this region. I believe that in addition to providing safe and secure network for Komodo to prosper under, Notary Node operators are the first-line of advocates for the project and have a duty to market Komodo.”

On 29th January 2017, the notary node election ended and the results were quickly announced on Bitcointalk, Reddit and Twitter. A total of 59 notary nodes had been elected (list on the left shows elected nodes in order of vote count). The winners from each region were Vanbreuk (EU), Juan S. Galt (NA), noashh (AR) and Satinder Grewal (SH) (see graphic below). In addition to the three development nodes (two held by jl777 and one by kolo), 62 notary nodes were ready to secure the KMD blockchain.

After months of intensive code development, especially the backend code from jl777 and the GUI from Boogieman, the first official release of the Iguana Desktop Application was released on 31st January 2017. It was made available for download on the official SuperNET Github repository at <https://github.com/SuperNETOrg/iguana/releases> initially for Windows and Linux operating systems. The Mac OSX version was released later.

Also on 31st January 2017, original ICO investors became able to request withdrawal of their allotted KMD holdings. It was also the day on which the testnet KMD blockchain transitioned to the mainnet KMD blockchain. It effectively meant that Komodo was the first fork of Zcash.

and not Test BTC. Soon after the notarization process their hardware, time and skills to solidify the o work with the network. (edited)

On 1st February 2017, CoinExchange.io became the first centralised crypto exchange to open KMD trading. The SuperNET team did not endorse or encourage traders to use it, but warned KMD holders to be curious about not storing their coins there. CoinExchange closed in October 2019.

<https://www.coinexchange.io/market/KMD/BTC>

On 5th February 2017, it was possible to trade KMD on three centralised exchanges, namely CoinExchange.io, Cryptox.pl and Cryptopia. On this day, a cryptocurrency renowned ranking service called CoinMarketCap integrated Komodo. It is officially described as follows:

"CoinMarketCap is the world's most-referenced price-tracking website for cryptoassets in the rapidly growing cryptocurrency space. Its mission is to make crypto discoverable and efficient globally by empowering retail users with unbiased, high quality and accurate information for drawing their own informed conclusions.

Founded by Brandon Chez in May 2013, CoinMarketCap has quickly grown to become the most trusted source by users, institutions, and media for comparing thousands of cryptoassets and is commonly cited by CNBC, Bloomberg, and other major news outlets."

What follows is a table showing the initially recorded fiat price of each and every KMD sourced from the three aforementioned exchanges. The first recorded Komodo market capitalisation was US\$11,172,077 according to CoinMarketCap on 5th February 2017.

	Open US\$	High US\$	Low US\$	Close US\$
5th February 2017	0.115808	0.115808	0.110987	0.110897
6th February 2017	0.111102	0.303831	0.106750	0.159718
7th February 2017	0.160024	0.168512	0.138552	0.149072

On 11th February 2017, it became possible to directly trade between KMD and Bitcoin on the Bittrex centralised cryptocurrency exchange. Now referred to as Bittrex Global, the exchange began operations on 13th February 2014 in beta testing mode. Twelve cryptocurrencies were originally available to trade (incl. BTC, LTC, PPC, VTC, FTC, DOGE and REDD) as it went fully live on 28th February 2014. It is one of the longest running exchanges in the crypto space.

<https://bittrex.com/Market/Index?MarketName=BTC-KMD>

On 27th February 2017, Audo Kowitz announced the first hard fork of the KMD blockchain since it transitioned to mainnet status. All nodes had to upgrade to the new version before block number 225,000.

As expected, block number 225,000 timestamped one week later:

Block #225,000 (Reward 3 KMD) March 5th 2017

On 6 August 2010, a major vulnerability in the bitcoin protocol was spotted. Transactions weren't properly verified before they were included in the transaction log or blockchain, which let users **bypass bitcoin's economic restrictions and create an indefinite number of bitcoins**. On 15 August, the vulnerability was exploited; over 184 billion bitcoins were generated in a transaction, and sent to two addresses on the network. Within hours, the transaction was spotted and erased from the transaction log after the bug was fixed and the network forked to an updated version of the bitcoin protocol. This was the only major security flaw found and exploited in bitcoin's history.

The highlighted portion is essentially what has happened. The difference is that bitcoin knew about it for over a week, while we didn't find out about it until the attack was under way. Also, I announced in realtime block 235300, which is the stopping of a chain.

If there is a bug in the future that allows to totally bypass the coin emission, then we will fix that to. You can count on that:

Agama

17th March 2017, KMD Newsletter:
<https://us14.campaign-archive.com/?u=9f4243304464b76b59152c7be&id=882a2b90f3>

On 5th March 2017, the SuperNET team launched a new feature called Jumblr, a decentralised anonymiser for KMD and BTC. It allowed James Lee to further test DEX and fix possible backend bugs. The developers invited testers to join the discussion at #jumblr on the official SuperNET Slack to help test its functionality. Jumblr was described as:

"It is a mixer or decentralised anonymiser that can be accessed through the Iguana wallet. Jumblr leverages Komodo's anonymous features to provide a service that is much more efficient than its centralised counterparts and does not require users to trust any entity with their coins."

Without warning, an attacker exploited a vulnerability in the Komodo code base (missing code that made it possible to create illicit KMD) on 11th March 2017. James Lee was quickly notified by a notary node operator and then diligently set forth to resolve the critical issue.

On 13th March 2017, James Lee posted the following:

"An attacker has taken advantage of an exploit and is generating coins. We made a new version that would stop this at 236,000 but the attacker ramped things up to levels that will force us to rollback the chain to 235,300."

Please do not do any transaction until we get a new version out to solve this."

To prevent total violation of KMD coin emission, James Lee decided to rollback the blockchain. It went against the immutability of the chain, but was considered necessary to eradicate the recently high inflation.

Block #241,777 (Reward 3 KMD) March 18th 2017

On 21st March 2017, an announcement was made that Iguana had been renamed to Agama, an open-source dApp. The SuperNET team described the name change as technical:

"We had built a new Bitcoin protocol implementation called 'Iguana Core' which is the other thing powering Agama apart from Komodo. Because these two things had very similar names it caused some problems, and we had to rename Iguana."

This name change also allows us to better talk about Iguana Core without confusing our audience. It is indeed a big piece of our innovation, and what jl777 has been building since 2015. It is the thing that powers our atomic cross-chain swap protocol."

The name change was easy to make, as we had not even branded Iguana yet and there had not been any marketing. We will be branding Agama in the future. Yes, it is a Iizard P.S. we will soon update our supernet homepage with more content and Iguana will be renamed to Agama.

Over the course of several weeks, the SuperNET team had been preparing to showcase Komodo, Agama etc. at a blockchain event called BlockShow Europe 2017 in Munich, Germany. Before the event occurred, the Komodo community was aware of the following information:

- <https://us14.campaign-archive.com/?u=9f4243304464b76b59152c7be&id=bc53458db5>
- BlockShow 2017 Infographics shown on pages 44-45.

On 3rd June 2017, KMD fiat price surpassed US\$1 for the first time...

On 25th June 2017, four members of the SuperNET flew to Copenhagen, Denmark to engage with some of the biggest names in finance. Kadan Stadelmann, Audo Kowitz, Alice and PTYTrader were looking forward to showcasing the technology that had already been developed over the last several years. The team invited the community to meet them at booth L12 (see below) at Money 20/20, the largest conference to be attended so far.

The Money 20/20 Fintech event lasted two days from 26th June to 28th June 2017. Similar to other conferences/events. The team forged new contacts with a broad spectrum of people and businesses. On the last day, a partnership was formed with an e-banking platform called Monaize.

In early July 2017, the SuperNET team announced that they had renamed their upcoming decentralised exchange technology to BarterDEX. James Lee reported, on 8th July 2017, that BarterDEX was nearing full functionality (nodes can post and fill order via command line only). Over 100 atomic swaps had been made among ten dedicated different people using the CLI, no GUI yet (team currently designing GUI).

During the summer 2017, BarterDEX beta testing (atomic swap protocol) would be a priority by a very active group. Agama wallet was still in beta testing 93% of all BTCD had been successfully swapped (only approx. 20,000 BTCD left to swap (12k on Polo and 8k on Bittrex)) - Yes, there is a deadline. It's in January 15th. After that date the ICO site will be closed for good and all unclaimed coins will be added to our working capital. Moreover, the team released a beta version of Jumblr, a tool for automated zero-knowledge proof transactions that scrambles and executes transactions of varying amounts at random intervals.

On 23rd July 2017, PTYTrader: The great news is that we completed the list yesterday. The next step is to install and sync each blockchain. Afterwards, a series of atomic swaps will take place along with other testing to find bugs.

I checked the list a few minutes ago and see that there around 10 coins successfully integrated (not counting all native assetchains). Currently JL777, SIU, KMDKrazy, Cipi, n4140j, grawal-satinder, pcba26, ca333, and myself are actively working on the BarterDEX. We are welcoming anyone who is willing to learn and begin testing. The day-to-day progress can be seen on Slack in the #tradebots and #BarterDEX channel.

On 3rd September 2017, Komodo Big Announcement
<https://steemit.com/komodo/@alberm/komodo-big-announcement>

On 24th August 2017, a promotional video titled 'SuperNET BarterDEX - A Technology for Native Decentralized Exchanges' was uploaded to the SuperNET YouTube Channel. The full transcript of the video was:

"The old centralised structure of coin exchange poses certain risks and limitations to our cryptocurrency projects. SuperNET proposes a solution, BarterDEX, a decentralised exchange where real coins are swapped in a peer-to-peer network. Instead of proxy tokens, we use a cross-chain atomic swap technology. We invite all cryptocurrency projects to list their coin in our exchange. Contact us to increase your outreach and volume. For more information, visit www.barterdex.com"

To demonstrate the capabilities of the BarterDEX native atomic swap exchange technology, PTYTrader created a couple of video walkthroughs showing how to swap KMD to LTC and KMD to BTC. PTYTrader described BarterDEX as currently needing a full blockchain, but possible that as it matures, come up with trusted setups for lite clients (native for now). About 45 coins integrated so far. James Lee had been working very hard to make BarterDEX (main priority) and SuperNET team expecting it to get better and more efficient during beta testing 1000's atomic cross-chain swaps in summer 2017.

<https://bitcointalk.org/index.php?topic=1605144.msg18331384#msg18331384>

SuperNET YouTube created on 2nd April 2017:
<https://www.youtube.com/channel/UCQM0Cc4tKli3W5WNy1uUSA/about>

Jumblr snapshot will happen in block 464,000

22nd August 2017, Due to the unfortunate timing of the bittrex wallet offline and I know there are those that procrastinate until the last days, I think it will be best to delay the JUMBLR snapshot until block 472000

So, the JUMBLR snapshot is changed from 464000 to 472000. A hotfix version is updated to deal with the bittrex wallet issue, but it will probably be a day or two before it comes back online.

Block 472000 will be early next week, probably Tuesday.

On 5th April 2017, BlockShow Infographics: <https://bitcointalk.org/index.php?topic=1605144.msg18464371#msg18464371>

(8th Sept 2018 marked date on which 1,000,000th block timestamped)

11th September 2018 - Welcome to Tech Tuesday! Things move fast at Komodo Platform. That's why the Komodo team has decided to release a weekly briefing to cover all of the progress the Dev Team is making. <https://komodoplatform.com/tech-tuesday-update/> (thanks @Mylo @Daniel CP)

September 2018 - Komodo innovates a way to make Bitcoin-protocol blockchains capable of supporting [UTXO smart contracts](#). <https://komodoplatform.com/crypto-conditions-utxo-based-smart-contracts/> (31st August 2018)

18th September 2018 - 2018 continues to be the year of mass adoption for Komodo. In this article, @Daniel CP outlines three more giant steps we're taking towards mass adoption: <https://komodoplatform.com/komodo-mass-adoption/>

30th August 2018 - ChainZilla Airdrop to Komodo Complete https://www.reddit.com/r/komodoplatform/comments/9bf7ta/chainzila_airdrop_to_komodo_complete/

31st August 2018 - Crypto-Conditions: UTXO-Based Smart Contracts written by @Daniel CP <https://komodoplatform.com/crypto-conditions-utxo-based-smart-contracts/>

3rd September 2018 - If you missed our **five bullet friday** email, it's been published to Medium. Catch up in 3 minutes... <https://blog.komodoplatform.com/five-bullet-friday-week-35-d5b6c18eaa8f>

10th September 2018 - AMA Monday. Find out more about the STAKED chain that's created to help with testing and finding bugs! It's innovative, interesting and we've posted an audio recording of a call with @Alright and @blackjok3r. Ask questions here: https://www.reddit.com/r/komodoplatform/comments/9dvuk/ama_monday_10th_september_to_talk_about_the/ That's happening at 11am GMT.

16th Sept 2018—<https://tokentops.com/news/creating-oracle-on-komodo-now-possible-komodo-kmd-news-september/>

19th September 2018 - Tech Tuesday #2 - if you don't follow the tech, i found the payment channels (a lightning network alternative) as the most interesting. Also: - #pirate updates and the zCash update strategy were a good discussion in discord last week. - #private-staked providing ecosystem services is coming to light as well. - A hint of an alternative wallet being possible Basically stuff that doesn't hit the front page until it's already built, you have the opportunity to read about developments as they happen! <https://komodoplatform.com/tech-tuesday-update-2/> Any questions, ask in reddit or somewhere here in discord

20th September 2018 - 5th Index of China's CCID research published on our Medium. Komodo ranked 8th out of all public Blockchain technology this month. We include their FAQ at the bottom of the post to help with your questions. <https://blog.komodoplatform.com/chinas-ministry-of-industry-and-information-technology-ranks-komodo-as-the-world-s-best-blockchain-82acacbe94b8> And here's our tweet <https://twitter.com/KomodoPlatform/status/1042765317922062336>

21st September 2018 - Time to look at one of our amazing tech adopters, in our first ecosystem spotlight where @Daniel CP shines a light on Verus Coin <https://komodoplatform.com/komodo-ecosystem-spotlight-verus/>. We'll post an AMA with @miketout from Verus Coin shortly too.

25th September 2018 - Our third Tech Tuesday is up and ready for you to read! Written by @Mylo, this week covers... - private transaction mining pool opens and OTC trades - bounty to port solidity to Komodo - tokens, gateways, oracles and a rhetorical question <https://komodoplatform.com/tech-tuesday-update-3/>

9th October 2018 - Tech Tuesday Update #5: A Summary Of Last Week's Development by @Mylo. <https://komodoplatform.com/tech-tuesday-update-5/>

26th September 2018 - Komodo: Detailed review on the project <https://medium.com/paradigm-fund/komodo-detailed-review-on-the-project-ca239a018422>

2nd October 2018 - Here's an exciting new announcement! Komodo has established an official collaboration with the University of Texas at Arlington. <https://komodoplatform.com/komodo-collaboration-with-university-of-texas/> https://www.reddit.com/r/komodoplatform/comments/9kssal/komodo_establishes_relationship_with_university/

October 2018 - Komodo establishes an official [educational relationship with the University of Texas at Arlington \(UTA\)](#) and is honored by Dr. Sajib Datta joining the Komodo team as a Strategic Advisor. <https://komodoplatform.com/komodo-collaboration-with-university-of-texas/> (2nd October 2018)

5th October 2018 - If you're on Android then you'll be happy to read Agama Mobile v0.1.0 is now available for download. Let us know what you think! <https://github.com/KomodoPlatform/agama-mobile/releases/tag/v0.1.0>

8th October 2018 - Awesome news for Android users. We have Agama Mobile released in Google Play store. Here is the link. Please give us 5* reviews and share the app with your friends <https://play.google.com/store/apps/details?id=com.supernet.agama>

8th October 2018 - Big news from @miketout at Verus Coin. They have solved Proof of Stake's two biggest problems: nothing at stake and weak subjectivity. I'm going to share an article and a reddit post here and encourage you to read and support because projects like this contribute their hard work and innovations back into our ecosystem. @everyone this is huge news! Reddit post - <https://www.reddit.com/r/CryptoCurrency/comments/9mbqb3/> [how_verus_coin_solves_nothing_at_stake_and_weak/](https://www.reddit.com/r/CryptoCurrency/comments/9mbqb3/how_verus_coin_solves_nothing_at_stake_and_weak/) Medium article by @Oliver Westbrook <https://medium.com/@EthAdvisor/how-verus-solved-nothing-at-stake-and-weak-subjectivity-proof-of-stake-problems-b4dd6a85086e>

8th October 2018 – jl777 posted: I cant overstate the magnitude of the achievement by miketout! In about a month using CC, he solved a problem that is still unsolved by ETH after years of casper research and it is in a much simpler method, which makes it much more likely to be robust. Congratulations Verus!!

10th Oct 2018 - Announcing 5 Komodo Infographic Finalists For A Final Round Of Voting.

https://www.reddit.com/r/komodoplatform/comments/9n4an7/announcing_5_komodo_infographic_finalists_for_a/

11th October 2018 - We have chosen 5 finalists for the infographic contest but, from here on out, all of the decision-making power lays in the hands of the community. Your votes @everyone will exclusively determine the Grand Prize Winner. No other factors will be considered. https://www.reddit.com/r/komodoplatform/comments/9n4an7/announcing_5_komodo_infographic_finalists_for_a/

18th October 2018 - last day of voting for the infographic contest today! Please drop in and take a good look around. We're waiting to read your comments. It is your community vote that will decide the winners. https://www.reddit.com/r/komodoplatform/comments/9n4an7/announcing_5_komodo_infographic_finalists_for_a/

19th October 2018 - Winner Winner Chicken Dinner! Announcing the winner of the Infographic Contest #018. Fantastic effort. It was very close and the response has been overwhelming. Thank you to @everyone who voted! https://www.reddit.com/r/komodoplatform/comments/9pn72b/announcing_the_winner_of_the_infographic_contest/ Tweet - <https://twitter.com/KomodoPlatform/status/1053371656197029889>

23rd October 2018 - "Komodo Platform: Why Assetchains?" - new post from @grewalsatinder up on our Medium blog. Please give it a read and some love <https://blog.komodoplatform.com/komodo-platform-why-assetchains-part-01-164325398efa>

11th October 2018 - Can I make a special request of you? Please actively share the finalists post in the groups you're active in on facebook, reddit, bitcoin talk and elsewhere (at least three would be enormously helpful). It's super important to get as many eyeballs on this as possible and as much feedback as we can. https://www.reddit.com/r/komodoplatform/comments/9n4an7/announcing_5_komodo_infographic_finalists_for_a/ If everyone asked three communities they were active in to come and vote on the infographics we'd really make an impact. These submissions are excellent!

16th October 2018 - Tech Tuesday Update #6: A Summary Of Last Week's Development by @Mylo <https://komodoplatform.com/tech-tuesday-update-6/>

16th October 2018 - Guarda KMD mobile wallet - now Open Source https://www.reddit.com/r/komodoplatform/comments/9on0xo/guarda_kmd_mobile_wallet_now_open_source/

23rd October 2018 - Tech Tuesday #07 is up and live. Written by @Mylo. <https://komodoplatform.com/tech-tuesday-update-7/>

26th October 2018 - A post about \$KMDICE on Bitcointalk. A PoW blockchain dice game created with Komodo's tech. It's the first minable decentralized dice game and takes advantage of Crypto Conditions. FYI @everyone. Bitcointalk Thread - <https://bitcointalk.org/index.php?topic=5054800.0> Discord Channel #kmdice Tweet - <https://twitter.com/KomodoPlatform/status/1055801438784364544>

29th October 2018 - A bounty has been posted by @Decker for the best instructional youtube video on how to play KMDICE. Bitcointalk: <https://bitcointalk.org/index.php?topic=5054800.0;all>

31st October 2018 - Our 'Tech Tuesday' by @Mylo is live. - Crypto Conditions – what is on mainnet today? - A Provably Fair PoW Blockchain Dice Game - Supply Chain Blockchain Adoption – How Do Business Partners Integrate? - Blockchain Agnostic Double Spend Protection For Crypto Exchanges <https://komodoplatform.com/tech-tuesday-update-8/>

1st November 2018 - Streamlined developer documentation is just about ready. @Bryan_Beus requests your feedback on the "New Developer Outline" https://www.reddit.com/r/komodoplatform/comments/9sulny/streamlined_documentation_is_just_about_ready/

6th November 2018 - An interview with one of our legacy team, @polycryptoblog who is working on our biz dev and integrations in our ecosystem. <https://www.youtube.com/watch?v=AgqIkCACIqA&feature=youtu.be&app=desktop>

6th November 2018 - Hey!! Tech Tuesday with some screenshots so it's not all just a wall of text. Any questions, hit us up in any channels about it, probably #dev-general or #cc-gui will find some quicker responses. Happy Tuesday from chilly but very beautiful Wales , it is the last night of the meetup and only @benohanlon and I are here. <https://komodoplatform.com/tech-tuesday-update-9/>

16th November 2018 - An updated welcome post on Reddit (thanks @Daniel CP) please support and comment with ideas for anything we may want to add <https://www.reddit.com/r/komodoplatform/comments/9xc1wd/> welcome to the komodo community here's what you/

31st October 2018 - <https://komodoplatform.com/new-feature-to-verify-dpow-notarizations/>

1st November 2018 - Streamlined developer documentation is just about ready. @Bryan_Beus requests your feedback on the "New Developer Outline" https://www.reddit.com/r/komodoplatform/comments/9sulny/streamlined_documentation_is_just_about_ready/

3rd November 2018 - Interviews with @Mylo and @polycryptoblog at our team meet-up in Wales <https://twitter.com/komodoplatform/status/1058683277626826752?s=21>

6th Nov 2018 - Komodo Integrates ETH & ERC20 Tokens To Agama Wallet https://www.reddit.com/r/komodoplatform/comments/9usai4/komodo_integrates_eth_erc20_tokens_to_agama_wallet/ 6th November 2018 - <https://komodoplatform.com/komodo-integrates-eth-erc20-tokens-to-agama-wallet/>

9th November 2018 - "Is Delayed Proof of Work the Answer to 51% Attacks?" by John Bogna published on CryptoSlate <https://cryptoslate.com/is-delayed-proof-of-work-the-answer-to-51-attacks-interview>

9th November 2018 - An exclusive sneak peek at the Komodo team meet-up in Wales where @SHossain, our QA and Support Manager, took some amazing footage with his drone. If you want to take a look you'll need to sign-up here <https://mailchi.mp/komodoplatform/five-bullet-friday>

11th November 2018 - Phase 4 of our rebrand with Ideas by Nature is in progress including updated messaging and an interim website. In mid-August, we announced a full rebrand. This post will highlight what has been completed as well as what is currently in production. <https://komodoplatform.com/komodo-rebranding-update/>

16th November 2018 - Agama iOS app beta test now open to public. All testers should join #deleted-channel in Komodo discord. The channel topic has invite link to get Agama Wallet Mobile from Apple App Store using Apple's Test Flight app

20th November 2018 - Agama wallet is now available on mobile for both Android & iOS - Collect your 5% active user rewards - ETH and over 150 ERC20 tokens to be added soon - 60 coins inc \$KMD \$BTC \$LTC \$QTUM \$DASH \$ZEC and \$DGB <https://komodoplatform.com/agama-mobile>

November 2018 - [Agama mobile is released](#) in a public beta phase for both Android and iOS. Komodo also adds [support for Ether and ERC tokens within the Agama wallet](#).
<https://komodoplatform.com/agama-mobile/> (20th Nov 2018)
<https://komodoplatform.com/komodo-integrates-eth-erc20-tokens-to-agama-wallet/> (6th November 2018)

27TH NOV 2018

TO

2ND JUNE 2019

27th November 2018 - I'm pleased to report a massive upgrade in technology for the entire Komodo ecosystem. Please note that this update is a hard fork. It is, therefore, a mandatory update. - Sapling Upgrade - VerusHash algorithm, bringing near-equality between CPUs and GPUs with the fastest CPU mining algorithm in the world - VerusPoS algorithm, allowing for a 50/50 hybrid blockchain, which can be combined with either 50% VerusHash or 50% Equihash for the proof of work component. - Time Locking, which allows mined rewards to be time-locked for random release, within a set of parameters. - The "Eras" parameter (ac_eras), allowing 3 eras of different coin emission schedules to be defined which alter emission, including slow start options, and linear exponential decay at specific, predetermined block height schedules. Read the full guide here: <https://komodoplatform.com/upgrade-guide-dec-15/>

30th November 2018 - "Having a single chain that needs to have all transactions is a design that just can't scale" - JL777 <https://blockpublisher.com/having-a-single-chain-that-needs-to-have-all-transactions-is-a-design-that-just-can-t-scale-says-founder-komodo-kmd/>

4th December 2018 - Tech Tuesday is live published by @Mylo <https://komodoplatform.com/tech-tuesday-update-13/>

December 2018 - Komodo successfully carries out a [huge ecosystem-wide update](#), including Sapling support and several new customizable parameters for Smart Chains.
<https://komodoplatform.com/komodos-sapling-upgrade-success/> (19th December 2018)

10th December 2018 - Sapling upgrade to Agama v0.3.0+ from Komodo Wallets. This article summarizes the action you need to take, when and what benefits you receive from Komodo's biggest source code upgrade. Important information for Ledger users follows. <https://komodoplatform.com/sapling-unifying-blockchain-technology/>

13th December 2018 - Please update your Agama to latest version 0.3.1d from our website. If you have been using version 0.3.0, it is recommended to update to this version which comes with some bug fixes and latest Komodo binary. Download Agama version 0.3.1d from here - <https://komodoplatform.com/komodo-wallets/> There are Installer version as default now and portable versions at alternative download page. Keep using this version as this is sapling ready. Please don't use any version older than 0.3.0 as those are not sapling ready and send any tx using those version will not confirm on mainnet from 15th December. If you have funds on any z address, please wait for further announcement after 20th December. You need to migrate your private funds to a sapling address. We will announce guides to do so and the required zmigrate dAPP. Please keep your wallet.dat and private keys safely backed up to ensure your funds are safe. With the hardfork there is not going to be any chainsplit, only one main-chain. If you keep using this version you will be on the main chain and your funds are safe as long as you are in control of your private key or wallet.dat file. If you are a Ledger user please checkout Ledger's announcement regarding our Sapling upgrade <https://support.ledger.com/hc/en-us/articles/360013635173> If you can't send your funds or don't want to send your funds to Agama, don't worry, your funds are safe. Anytime you can use those funds to send or claim reward securely using an offline computer. Read our guide here <https://support.komodoplatform.com/en/support/solutions/articles/29000026860-komodo-sapling-upgrade-important-info-for-ledger-users> Please report any critical bugs if you find and any suggestions to make things better. Thanks for using Agama.

19th December 2018 - Komodo's Sapling upgrade was activated smoothly, providing a huge tech boost to more than 40 blockchains in the Komodo ecosystem. Also, all KMD funds must be moved out of z-addresses by Feb 15, 2019. Learn more in this update written by @Daniel CP here: <https://komodoplatform.com/komodos-sapling-upgrade-success>. @everyone Retweet - <https://twitter.com/KomodoPlatform/status/1075337732552097792> https://www.reddit.com/r/komodoplatform/comments/a7las5/komodos_sapling_upgrade_was_activated_smoothly/

11th December 2018 - 7 new assetchain parameters coming on December 15th. Komodo's assetchains have always had a number of customizable parameters. These new parameters will be added to the Komodo code base, along with the Sapling upgrade and increased block sizes. Read more here: <https://komodoplatform.com/new-assetchain-parameters/> <https://twitter.com/KomodoPlatform/status/1072806974809665536>

11th December 2018 - It's time for the Tech Tuesday Update #14 from @Mylo and important info for Ledger users regarding the Sapling update from @SHossain. 1. Tech Tuesday post: <https://komodoplatform.com/tech-tuesday-update-14/>. 2. Important Info for Ledger Users regarding the Sapling update: <https://support.komodoplatform.com/support/solutions/articles/29000026860-komodo-sapling-upgrade-important-info-for-ledger-nano-s-users>.

15th Dec 2018 - New Achievement in the field of Blockchain by Komodo Platform https://www.reddit.com/r/komodoplatform/comments/a6efi0/new_achievement_in_the_field_of_bloc_kchain_by/

30th December 2018 - Dear members, we recently implemented dPoW (delayed Proof of Work) Confirmation field into Komodo and assetchains, thanks to @dukeleto. It basically means any confirmation number it shows for KMD deposit which is more than 1 is secured by dPoW and can't be double spent. With this exchanges are safe to reduce required confirmations to credit any deposits. Works for KMD and AC which has dPoW. Currently, Bittrex and Digital Price exchanges are using this feature. Digital Price already using 20 confs which is pretty fast. We have reached out to Bittrex if they wish to reduce required confs. We well announce we have more info. Thanks for being here. I wish you all a very Happy New Year. P.S.: Agama users can test this feature using Komodo or any assetchain in native mode and sending out a tx. More details on dPoW-Conf - <https://docs.komodoplatform.com/komodo/dPOW-conf.html>

4th January 2019 - The Komodo-QT wallet is now available for testing on Windows and Linux. It supports Z-Transactions. This wallet was developed by the Ocean-QT team! <https://github.com/DeckerSU/KomodoOcean/releases/tag/v2.0.15-rc2-g28>
Retweet @PTYX <https://twitter.com/Chainzillao/status/1081203174428549122>

14th January 2019 - Delayed Proof of Work; a conversation with @jl777c
<https://blog.komodoplatform.com/delayed-proof-of-work-a-conversation-with-jl777-ac5c620a15d> Retweet
<https://twitter.com/KomodoPlatform/status/1084769270343569408> Facebook <https://www.facebook.com/KomodoPlatform/posts/796809343998972> LinkedIn <https://www.linkedin.com/feed/update/urn:li:activity:6490535181525614592/>

28th January 2019 - The first Chinese Blockchain Rankings of 2019 have been released. Komodo is ranked higher than Bitcoin and appears in the top 10 again. This time we're no.9 overall and no.4 for blockchain technology. <https://blog.komodoplatform.com/chinese-blockchain-rankings-komodo-is-ranked-higher-than-bitcoin-7fd4d68e5dd>

29th January 2019 - Tech Tuesday Development Update @everyone – 2019 Week 5: Peer To Peer Orderbooks And The "First Atomic Swap" History <https://komodoplatform.com/tt2019-5-peer-to-peer-orderbooks-first-atomic-swap/> written by @Mylo.

31st Jan 2019 - <https://www.chainbits.com/reviews/komodo-review/>

1st February 2019 – Komodo Five Bullet Friday: <https://mailchi.mp/6e9655d84c8a/fivebulletfriday2019-2946513>

18th January 2019 - We're making some important changes to our main chain which showcase how adaptable our blockchain technology is. I recommend reading our newly posted article written by @Daniel CP "Komodo Showcasing Multi-Chain Architecture: Z-Transaction Functionality Is Moving To A New Interlinked Chain" to get up to speed. <https://komodoplatform.com/z-transaction-functionality-is-moving/>

24th January 2019 - Two short twitter threads from our CTO @ca333 worth reading @everyone ! 1. Crosschain atomic swap has been executed/processed solely with SPV technology which means users wont have to sync (download) a full blockchain db or to run a blockchain daemon in order to use our DEX technology <https://twitter.com/0xca333/status/108824559134171136> 2. Imagine if you could import/load new consensus rules DURING runtime? <https://twitter.com/0xca333/status/1087904226460745730>

1st February 2019 - Komodo is pleased to announce a Strategic Technology Partnership with Coinbene, a major crypto exchange based in China. Coinbene has independently audited and validated Komodo's Blockchain Security Service and will be officially endorsing it to at-risk coins and tokens listed on the exchange. The partnership will also explore opportunities for Coinbene to implement Komodo's industry-leading atomic swap technology to make crypto trading more secure and more decentralized. We're happy to be working with Coinbene to support their 2019 security initiative and to be making the blockchain space more secure for developers, exchanges, and investors alike. <https://komodoplatform.com/komodo-coinbene-partnership/>
<https://u.today/coinbene-teams-up-with-komodo-to-prevent-51-percent-attacks-plans-to-list-kmd-later>

February 2019 - Komodo announces a [Technology Partnership with Coinbene](https://komodoplatform.com/komodo-coinbene-partnership/), in which Coinbene officially endorses dPoW as the industry's premiere security solution.
<https://komodoplatform.com/komodo-coinbene-partnership/> (1st Feb 2019)

1st Feb 2019 - Bittrex Tweet: On February 7, we're launching a US dollar (USD) market for Komodo (KMD)
https://www.reddit.com/r/komodoplatform/comments/am4wvx/bittrex_tweet_on_february_7_were_launching_a_us/

5th February 2019 - In cooperation with the Zcash Security Team, the Komodo Development Team was able to eliminate a critical vulnerability that had been identified in the Zcash code base. <https://komodoplatform.com/komodo-eliminated-critical-vulnerability/>

6th February 2019 - Komodo is pleased to announce that Bittrex has decided to list a KMD-USD trading pair on its exchange starting on February 7, 2019. If you're a Bittrex user and you're interested in taking advantage of this new KMD-USD trading pair, check out this article to learn more.

8th February 2019 - Komodo Rebrand Update #2: Product Strategy & Development. As @everyone may already know, Komodo is in the midst of a full rebrand. This means that the Komodo team is redefining the project from the ground up, developing products that are go-to-market ready, creating more developer resources, and implementing a business strategy that will ensure Komodo's success for decades to come. Right now, the Komodo team has a strong focus on product strategy and development. Learn more about Komodo's rebrand progress and get a sneak peek at Komodo's new Custom Blockchain Generator web app in this new blog post. <https://komodoplatform.com/komodo-rebrand-update-2/>

14th February 2019 - **@everyone** this is a reminder: 12 hours left until the sapling deadline. If you have funds in a z-address please move them to a transparent address. If your funds are in a r-address you don't need to do anything. If you have any questions please ask in **#support**. <https://komodoplatform.com/komodos-sapling-upgrade-success/> Tweet - <https://twitter.com/KomodoPlatform/status/1096020845171040256>

2nd February 2019 - 2018 was a huge year of evolution and growth for Komodo. Despite an ongoing bear market, the Komodo Development Team delivered several groundbreaking technologies throughout the year. As a result, Komodo was able to make great progress with regard to business development, partnerships, and marketing. To learn more about Komodo's growth in 2018, as well as updates about plans for 2019, check out our year-end report. <https://komodoplatform.com/komodo-2018-year-end-report-final/>

- 23rd May 2019 - @polycryptoblog were a guest on crypto101podcast.com – great 15 min introduction to Komodo. Listen here: <https://soundcloud.com/matthew-aaron-690749808/komodo-namecoin-vertcoin-101/s-zU6y0> Our Head of Business Development - Jason Brown talks about Komodo Platform and its ecosystem. #Blockchain #DEX \$KMD. Thank you @Crypto_101 for the interview.
- 25th May 2019 – KMD listed on Graviex: <https://graviex.net/markets/kmdbc>

7th December 2018 - Creating streamlined documentation for new developers is a primary focus of the team, and if you're a developer who's interested in blockchain, this post will give you that, and also highlight some of the advantages Komodo offers over other platforms. <https://komodoplatform.com/updated-documentation-for-developers/> Another project adopting dPoW <https://twitter.com/SUQAfoundation/status/1071007895465193472> and I've found a short guide to them here: <https://medium.com/@izlo/suga-coin-what-you-need-to-know-and-how-you-can-join-suga-right-now-16eb227c03c0>.

13th December 2018 - A few days ago I recorded an interview with @Bryan_Beus , author of our whitepaper, to explain dPoW, scaling and security, in response to Justin Ehrenhofer @Jehrenhofer's Medium article: <https://medium.com/@Jehrenhofer/no-dpow-isnt-a-perfect-solution-7e6e43cc20be>. 1. Listen on Soundcloud here: <https://soundcloud.com/blockchainists/siddhartha-the-author-of-komodos-whitepaper-explains-delayed-proof-of-work>. 2. Retweet - <https://twitter.com/benohanlon/status/1073183489904791554> 3. Expect an in-depth Medium post from @grewalsatinder which is coming soon.

18th December 2018 - It's almost the end of 2018, and this year we have witnessed a number of 51% attacks (double spending) on Proof of Work (PoW) based blockchains. In response to Justin Ehrenhofer's dPoW article, we explain Komodo's delayed Proof of Work (dPoW). This is probably the best explanation of dPoW written so far! Great work @grewalsatinder <https://blog.komodoplatform.com/delayed-proof-of-work-explained-9a74250dbb86> @everyone. Tweet - <https://twitter.com/KomodoPlatform/status/1075006764750376960> Bookmark this article and share it everytime someone talks about dPoW, 51% attacks or securing smaller chains.

ANTARA WENT LIVE & KOMODO REBRANDED

3RD JUNE 2019

TO

3RD DEC 2019

June 2019 - [Komodo introduces the Antara Framework](https://komodoplatform.com/komodo-is-introducing-antara-an-end-to-end-smart-chain-development-framework/), a toolkit for custom blockchain development. <https://komodoplatform.com/komodo-is-introducing-antara-an-end-to-end-smart-chain-development-framework/>
(3rd June 2019)

3rd June 2019 - Komodo Is Introducing Antara, An End-To-End Smart Chain Development Framework The Next Step In Building An Open, Programmable And Interoperable Multi-Chain Ecosystem Komodo technology has been rapidly evolving during the past years and we are no longer the same project. We have launched an 'evolution campaign' to start introducing the new Komodo terminology and product offerings. Learn more: <https://evolve.komodoplatform.com/>
<https://komodoplatform.com/komodo-is-introducing-antara-an-end-to-end-smart-chain-development-framework/>

3rd June 2019 – Introducing Antara Framework and Smart Chains https://www.youtube.com/watch?v=rLgoI_PDxbM&feature=youtu.be

USE THIS AMA TO HELP WITH CHAPTER OPENING: 3rd July 2019 - <https://komodoplatform.com/antara-framework-rebrand-ama/> AMA on the 2nd of July, 5PM UTC in Discord

12th June 2019 - "Cryptobriefing" interviewed our CMO @Steve Lee ref. the recent incident - interesting read about our unconventional move to rescue our users funds: <https://twitter.com/0xca333/status/1138704706874880000> - <https://cryptobriefing.com/komodo-developers-hacked-users/>

13th June 2019 - Our Business Development Manager Jason Brown (@polycryptoblog) will be speaking at the Mining Disrupt Conference! The conference will take place at the DoubleTree Hilton hotel in Miami, Florida from July 23 to July 24. Use the promo code KOMODO to receive 20% off your tickets! Learn more about the event and reserve your tickets here: <https://www.eventbrite.com/e/mining-disrupt-conference-the-official-bitcoin-blockchain-mining-summit-tickets-57880812067>

17th June 2019 - Komodo Platform's Antara Framework: Another Giant Leap For Blockchain <https://cryptobriefing.com/komodo-platform-antara-blockchain/>

12th July 2019 – Torsten Szabolcs Sandor, a member of the Komodo Marketing Team, was interviewed by iBlock TV at the Asia Blockchain Summit in Taipei, Taiwan. In the interview, Torsten discusses how Komodo's technology has expanded far beyond its privacy coin roots and how Komodo's technology is different from other blockchain platforms. "What we're building is an interoperable, multi-chain ecosystem, or a platform, that other projects or companies can build applications on." <https://twitter.com/KomodoPlatform/status/1149688966729347074> <https://www.linkedin.com/feed/update/urn:li:activity:6555457644042215424> <https://www.youtube.com/watch?v=aPXNYLvjGvc&feature=youtu.be>

4th June 2019 – Kadan Stadelmann CTO - we are at the Money2020, THE flagship fintech event in Europe and the rest of the world. We've had the pleasure to showcase our new mobile DEX wallet "AtomicDEX mobile" & the first truly grandma-friendly blockchain creation suite with the code-name "Chainlizard"- this is our BaaS Webapp that allows you to create a new blockchain with wallets, explorers, sync- & seednode infrastructure, SPV servers, dPoW integration and much more within MINUTES! We also discussed potential partnerships ref. 3rd party-utilization of "AtomicAPI", our 3rd gen marketmaker software = DEX core. And last but not least we've checked out the blockchain-fintech space for you. Our marketing-team will provide more details soon - stay tuned! <https://twitter.com/0xca333/status/1135915458316492801>

7th June 2019 - Update Regarding Vulnerability Recently Discovered In Komodo's Agama Wallet <https://komodoplatform.com/update-agama-vulnerability/>

4th July 2019 - <https://komodoplatform.com/independence-from-custodial-trading-and-sovereignty-from-closed-platforms-with-komodo/> <https://komodoplatform.com/atomicdex-komodos-revolutionary-p2p-atomic-swap-decentralized-exchange-now-in-public-beta/>

4th July 2019 - We are very excited to announce the public beta phase of AtomicDEX, the industry's only mobile-native decentralized exchange built on anything-to-anything, asset-agnostic atomic swaps. This represents a generational change in atomic swap technology. <http://decrypt.co/7749/komodo-releases-mobile-app> AtomicDEX is a multicoин wallet + DEX hybrid. It is the reference implementation of Komodo's AtomicAPI, the world's first 3rd generation atomic swap tech. After months of internal testing, we are opening up AtomicDEX on Android and iOS for a limited number of beta testers. Sign up at <https://atomicdex.io/> be one of the first to test AtomicDEX, and join us as we continue to revolutionize the blockchain space.

14th July 2019 - We hope that you all saved the date for tomorrow 15th July 2019! Besides the Antara Framework, we will also launch a new website, new visual identity, updated white paper, and partner network program.

16th July 2019 – Today is one of the most exciting days in Komodo's history:
1. Our new logo and our new messaging are live on <https://komodoplatform.com/> 2. The Komodo blockchain and all Smart Chains have been successfully updated at block 1444000. 3. Antara, an adaptable framework for simple, end-to-end blockchain development is now live on the Mainnet. Antara makes it easier than ever before to launch a Smart Chain, activate modules, and start building blockchain-based applications. 4. We are very excited to unveil the public beta of Antara Composer, a web app which lets anyone set up a Smart Chain, and deploy it on AWS complete with seed nodes and mining nodes, in just minutes: <https://composer.kmd.io/> 5. The first 100 people are already testing AtomicDEX, with more to come. 6. Lastly, we completely revamped our developer documentations. With over 1000 pages of content, we believe it is one of the best in the whole industry: <https://developers.komodoplatform.com/>

July 2019 - Komodo launches the beta version of the [Antara Composer](#), a web application that lets users launch a Smart Chain from an easy-to-use interface.

<https://composer.kmd.io/>

18th July 2019 – Komodo Rebrand is over <https://medium.com/komodopioneers/komodo-rebrand-campaign-meet-the-new-komodo-1d234ffdc7cd>

19th July 2019 – Biweekly Update 5th July 2019 – 19th July 2019 **Komodo: Make Your Own Blockchain In Just Minutes, AtomicDEX, Rebranding** <https://medium.com/paradigm-fund/komodo-make-your-own-blockchain-in-just-minutes-atomicdex-rebranding-c9f5e8b8299d>

15th July 2019 - BOOM: Komodo Prepares To Drop AtomicDEX <https://cryptobriefing.com/boom-komodo-prepares-atomicdex/>

17th July 2019 - The atomicDEX mobile beta program successfully launched on iOS and android and you can now join us in #atomicdex-beta - We want to celebrate this big release with the first part of a special DEX campaign. Post a fancy atomicDEX mobile photo of you or trading screenshot and we will randomly tip you some KMD out of a 777 KMD pot - use one from the below scenarios: a) Tweet a photo of yourself with atomicDEX mobile running on your phone (showing your KMD QR code - or post the KMD address in a 2nd tweet-comment) from a cool location b) Tweet a screenshot of a successful atomicDEX mobile RICK/MORTY swap and one with your KMD address QR code (from within atomicDEX mobile) - add some info ref. your experience to the tweet c) Tweet a video of you using atomicDEX mobile (the coolest video gets on our official channels and blogs) Please use hashtags #dex-it #atomicdex #DEX #atomicswaps #mobiledex #mobileatomicswaps and tag us in the tweets (@komodoplatform) - share your tweets in the #talk-general and #dex-it channels. Happy beta! <https://atomicdex.io/> <https://www.reddit.com/r/komodoplatform/comments/cecdk1/> https://atomicdex_beta/

17th July 2019 - <https://hacked.com/blockchain-in-sixty-seconds-komodo-launches-diy-smart-chain-builder/>

19th July 2019 - How Komodo Platform's Smart Chains Accelerate Blockchain Venture Building <https://redfoxlabs.io/how-komodo-platforms-smart-chains-accelerate-blockchain-venture-building/>

23rd July 2019 - Binance will support Komodo staking https://www.reddit.com/r/komodoplatform/comments/cgqh7h/binance_will_support_komodo_staking/

31st July 2019 - AtomicDEX version 0.1.5 released. we just released the new atomicDEX mobile 0.1.5 which brings a few improvements and updates. We upgraded RICK and MORTY to more economic smart-chains with a hybrid PoW and PoS structure. Furthermore does v0.1.5 bring more freedom to the mobile DEX by showing the full market-view and enabling manual (limit) order-creation regardless of already existing orders. Please update atomicDEX mobile asap. Happy Testing!

6th August 2019 – AtomicDEX version 0.1.53 released

9th August 2019 - We have summarized the Q&A's of Wednesday's #AMA in our blog. <https://komodoplatform.com/atomicdex-ama-towards-decentralized-trading/> 7th August 2019 at 17:00 UTC

10th August 2019 - AtomicDEX mobile 0.1.6 is out - it is available on Google PlayStore. (iOS/TestFlight pending approval): This version resolves all known technical issues and bugs and brings two significant UX/UI enhancements: I) notifying users for the required ETH fee when trading ERC or ETH II) showing the fee-rates for transparency and clarity

6th September 2019 - <https://thedailychain.com/komodos-long-anticipated-atomicdex-goes-public-beta/>

23rd-24th July 2019 - Komodo is excited to announce that Business Development Manager Jason Brown will be speaking at the [@MiningDisrupt](#) Conference! It will take place at the DoubleTree Hilton hotel in Miami from July 23-24.

24th July 2019 - AtomicDEX beta update: The feedback regarding AtomicDEX has been very positive and helpful. We have been monitoring and scaling the beta in a controlled way and now we're happy to announce that we will be sending invitations to the remaining first-round testers this week! <https://atomicdex.io/>

29th July 2019 - More than 1000 beta testers have already come together to test one of our new flagship products, the AtomicDEX. Register for the beta and enjoy the benefits of the world's first mobile-native, asset-agnostic atomic swap DEX <http://eepurl.com/gty1iX>

July 2019 - Komodo launches the beta of [AtomicDEX](#) beta, Komodo's third-generation [decentralized exchange](#).
<https://atomicdex.io/> <https://komodoplatform.com/decentralized-exchange/>

12th August 2019 - Have you already registered for the [#atomicDEX](#) beta? If not, you can do it here: <https://atomicdex.io> The following assets are tradable in the beta: [\\$RVN \\$DGB \\$QTUM \\$DOGE \\$BTC \\$DASH \\$RFOX \\$ETH \\$VRSC \\$USDC \\$BCH \\$LTC \\$KMD \\$ZILLA \\$BAT](#)

August 2019 - Komodo develops the [new nSPV technology](#), a super light client technology that is hundreds of times more efficient than current SPV implementations.
<https://komodoplatform.com/nspv-next-generation-spv/> (13th Aug 2019)

August 2019 - Komodo innovates [Adaptive Proof of Work \(APoW\)](#), an improved version of [Proof of Work](#) consensus rules that is fully resistant to difficulty stranding attacks.
<https://komodoplatform.com/adaptive-proof-of-work/> (16th Aug 2019)

6th September 2019 - AtomicDEX goes public beta! The Komodo Dev Team recently released version 0.1.7 of AtomicDEX. This latest release is a public beta, meaning that anyone can download and begin testing AtomicDEX! You can download AtomicDEX on Android here. <https://play.google.com/store/apps/details?id=com.komodoplatform.atomicdex&hl=en> AtomicDEX will be made public for iOS users over the weekend and the link will be posted to all Komodo social media channels as soon as it's available. Happy swapping!

24th September 2019 - we got a new community growth initiative! We have announced new community guidelines, community moderation program, and a community bounty campaign. Please sign-up as a community moderator and let us know who should get paid bounties. Read more from the blog post. <https://komodoplatform.com/komodos-new-strategic-focus-on-building-a-stronger-community/>

13th September 2019 – Biweekly Update 30th August 2019 – 13th September 2019: <https://medium.com/paradigm-fund/komodo-few-news-47216516aa15>

27th Sept 2019 - Komodo wrote DEX history once again - today our devs executed the worlds first native web-browser atomic swap!
https://www.reddit.com/r/komodoplatform/comments/da4b15/komodo_wrote_dex_history_once_again_today_our/

7th October 2019 - [@ca333](#) sat down for an excellent interview with BLOCKTV. He discusses Komodo's technology, describes the history of Komodo's development with respect to DEX technologies and atomic swaps, and explains why AtomicDEX is the industry leader today <https://twitter.com/KomodoPlatform/status/1182367493014335489?s=20>
<https://blocktv.com/watch/2019-10-07/5d9b47a4cb966-komodo-looks-to-lead-in-decentralized-exchanges>

1st October 2019 - coinexchange.io is closing down - please withdraw your funds asap. <https://www.coinexchange.io/news/post/85/>

22nd October 2019 - [@ca333](#) recently sat down with CoinPM for an interview. "AtomicDEX is, for me, likely the most exciting tech layer right now inside Komodo." That's a quote from [@ca333](#). Listen to this fantastic podcast with [@ca333](#) to hear why he thinks AtomicDEX is the most exciting thing happening within the Komodo ecosystem right now. <https://twitter.com/KomodoPlatform/status/1187701860427280385?s=20>
<https://soundcloud.com/coinpm/talks-kadan-stadelmann-cto-of-komodo>

10th October 2019 - <https://medium.com/the-capital/blockchain-talkers-smart-marketing-with-steve-lee-of-komodo-platform-1b7cb7e51b53>

25th October 2019 - We're excited to announce a community stress test of AtomicDEX on Oct 31 from 12pm GMT to 6pm GMT. Help test some of the blockchain industry's most cutting-edge technology and be entered to win up to 777 KMD in the process! Find all the details you need in this post <https://komodoplatform.com/atomicdex-stress-test/>

8th October 2019 - we just published 'Market Maker 2: The Engine That Powers The AtomicDEX Protocol' This blog post will explain in great detail Market Maker 2, the underlying protocol that powers secure, peer-to-peer atomic swaps on AtomicDEX. <https://komodoplatform.com/market-maker-2-overview/>

30th October 2019 - <https://thedailychain.com/atomicdex-halloween-stress-test-competition/>

13th October 2019 - <https://medium.com/paradigm-fund/komodo-web-based-atomicdex-details-of-market-maker-2-the-underlying-protocol-of-decentralized-5c70ecbd5a6>

30th October 2019 - A very big thanks to Komodo Notary Node operator [@webworker01](#) who just doubled the prize pool for the upcoming AtomicDEX stress test on Oct 31! Now, 20 testers will win 77.7 each & there will be 2 grand prize winners of 777 KMD each! also [@smk762](#) created a leaderboard to track the best swappers during the stress test. There is the option to register your Discord username to an address. If you'd like to do so, please DM [@smk762](#)

30th October 2019 – @Audo is currently live with @LooTz at <http://cryptocore.airtime.pro/>. They will talk about Komodo in general, our upcoming stress test, and AtomicDEX. Tune in!

30th October 2019 – @polycryptoblog represents Komodo at the World Crypto Conference in Las Vegas, if you are there, he would be happy about your visit. You can find him at booth M9 | Brera Ballroom.

4th November 2019 - In October 2018, Komodo established an educational relationship with The University of Texas at Arlington. Now, one year later, Komodo is pleased to report the sponsorship of an educational hackathon in cooperation with HackUTA. Read more here. <https://komodoplatform.com/34-students-at-uta-develop-blockchain-dapps-with-komodo-technology/>

4th November 2019 - AND THE COMMUNITY BOUNTY AWARD GOES TO.... A month ago, the Komodo team announced a new plan to acknowledge and reward key community contributions each month. The first month is now behind us, and it's time to honor those who made significant contributions to the Komodo project! The Komodo team was so pleased with the community's activity during the past month that the decision was made to appropriately reward the bounty winners this month by adding 3,000 KMD to the baseline budget of 777 KMD. This brings the total community bounty budget to 3777 KMD for October 2019. Find all the details you need in this post. <https://komodoplatform.com/komodo-announces-the-first-recipients-of-the-monthly-community-bounty-awards/> The Komodo Team congratulates the bounty winners!

12th November 2019 - While the Antara Composer is still in a beta phase, it's fully functional and can help you launch your production-ready Smart Chain today.

4th December 2019 - KMDLabs is holding a testing and bug-hunting contest this Sunday, December 8 at 12:00 UTC. As long as 20 or more people register to participate, the KMDLabs team will give away at least 1500 KMD and 10,000 LABS in prizes! Learn more in this post on Reddit: https://www.reddit.com/r/komodoplatform/comments/e5zvki/kmdlabs_is_holding_a_bughunting_contest_on_friday/ Please note the KMDLabs contest mentioned above that was previously announced as starting on Friday 12:00 UTC is being pushed back to start at Sunday 12:00 UTC

October 2019 - Komodo holds the first public [AtomicDEX stress test](https://komodoplatform.com/atomicdex-stress-test/), with over 100,000 atomic swaps attempted in a four-hour timeframe. <https://komodoplatform.com/atomicdex-stress-test/> (25th Oct 2019)

2nd November 2019 – AtomicDEX Stress Data analysed over the last two days - We now have a list of the stress test winners! The prizes will be sent during the coming days. Huge thanks again to everyone who participated and kept going during the test. Komodo will announce the next phase of stress testing as soon as the DEX is ready for a full-scale scenario, in which multiple trading pairs will be tested while automatic spam clients bloat the network. We also decided to send 0.777 KMD to everyone who kept testing but didn't win a prize. Keep testing the AtomicDEX app and send us feedback. We are continuously developing the application and thinking on how to improve it for the full release. We are looking to create one of the best wallets out there! <https://komodoplatform.com/first-atomicdex-stress-test-successfully-completed/>

6th November 2019 – Komodo was listed on Bilaxy exchange

9th November 2019 – KMD trading began on CITEX <https://citex.zendesk.com/hc/en-us/articles/360035681832-Announcement-on-the-Launch-of-KMD-in-CITEX-Main-Board-Trade-Zone> 15th November 2019 - KMD has been listed on Citex, KMD/BTC, and KMD/ETH deposits and withdrawals are now open. <https://www.citex.co.kr/#/home>

2nd December 2019 – KMD has been listed on VCC Exchange, KMD/BTC, deposits and withdrawals are now open. <https://support.vcc.exchange/hc/en-us/articles/900000025406-Komodo-KMD-Now-Available-on-VCC-Exchange>

Other events:

- 18th June 2019 – KMD/HUSH trading pair went live on Graviex exchange
- 20th June 2019 – Komodo added to crypto.com app
- 19th July 2019 – KMD trading began on CoinEx
- 9th August 2019 - <https://www.coinbureau.com/review/komodo-platform/>
- 12th August 2019 – ChangeNow now supports KMD
- 14th August 2019 – Komodo added to NOWpayments.io
- 21st August 2019 – Make sure to follow @KMDCommunity Twitter to make sure you don't miss any community activity that does not make it to official KMD Twitter
- 23rd August 2019 – xChange.me added KMD
- 2nd September 2019 - Komodo had its first meetup on the continent of Africa! It was organized by a group of students on the Kampala International University in Uganda.
- 20th September 2019 – KMD now live on Liquid exchange https://blog.liquid.com/what-is-komodo?utm_source=Twitter&utm_medium=Post&utm_campaign=SocialSharing 23rd September 2019 – KMD now live on Liquid Global exchange
- 30th September 2019 – Cryptwerk.com added KMD
- 17th October 2019 – Jason Brown Interview on Crypto Rice: <https://www.youtube.com/watch?v=vCb1ubC8aGY&feature=youtu.be>
- 22nd October 2019 – KMD has been added to <https://www.cryptocurrencycheckout.com/>. If you run a website or have a webshop, you can now accept KMD as a payment method with little to no coding experience!
- 28th October 2019 – Komodo is excited to announce that Travala, the world's leading crypto-friendly hotel booking service, is now accepting KMD as a form of payment. Looking to book your winter holidays soon? Book your hotel with KMD on [www.travala.com!](http://www.travala.com) <https://komodoplatform.com/travala-lists-kmd/>
- 3rd November 2019 – polycryptoblog meet up with Tron Black (lead RVN developer)
- 13th November 2019 - The Komodo team is excited to report that a stablecoin suite is now listed for trading on AtomicDEX. Five stablecoins — USD Coin (USDC), True USD (TUSD), Dai Stablecoin (DAI), Paxos (PAX), and Binance USD (BUSD) — are now available for peer-to-peer trading on AtomicDEX. Read more here. <https://komodoplatform.com/stablecoin-suite-atomicdex/>
- 14th November 2019 – We are happy to announce that KMD has been added to Atomic Wallet! Atomic Wallet is a non-custodial wallet with a built-in exchange that supports over 500+ digital assets <https://atomicwallet.io/komodo-wallet>
- 2nd December 2019 – Komodo now listed on Biteeu.com exchange
-

14th August 2019 – Ashton Addison (EventChain) interviewed CTO Kadan Stadelmann <https://www.youtube.com/watch?v=S8GhTm6ISLA>

22nd August 2019 – @Steve Lee got interviewed by the hosts of CRYPTO101 Podcast, Bryce and Pizzamind. Hear the fascinating origin story of Komodo and learn more about the Antara Framework and atomicDEX. <https://twitter.com/KomodoPlatform/status/1164613874756268032?s=20> Steve Lee CSO on <https://soundcloud.com/crypto101podcast/ep-258-going-deep-w-komodos-steve-lee>

6th November 2019 - Komodo is pleased to announce the beginning of a new line of content called Blockchain Fundamentals that aims to promote education and knowledge in the blockchain space. Check out the very first post on cryptocurrency mining here. <https://komodoplatform.com/cryptocurrency-mining/>

25th November 2019 - We are happy to announce that KMD has been added to <https://www.metalpay.com/> Metal Pay is a P2P payments platform that allows users to earn crypto for sending and receiving USD held in FDIC-insured accounts. The Metal Marketplace offers a selection of 22 cryptos you can buy & sell for as low as 0% fees! <https://twitter.com/metalpaysme/status/1199044557264035840?s=20> <https://blog.metalpay.com/metal-pay-welcomes-komodo/>

The banner features the Komodo logo at the top left. In the center, it says "Obsidian Dragon Update: v0.5.0" and "Komodo Is Activating An Ecosystem Update On Dec 20". Below this, a text box states: "Komodo is upgrading the code base to version 0.5.0 on December 20, 2019. The update includes improvements to the Antara Framework and DeFi features." To the right is a 3D rendering of three circular nodes connected by lines on a teal surface. At the bottom right are social media links: Twitter (@komodoplatform), GitHub (@komodoplatform), and Discord (komodoplatform.com/discord).

7th December 2019 - **November Community Awards Are Here** November is the second month we sent community bounties. We awarded a total of 3000 KMD this month. Huge thank you for all our contributors! Also, those that didn't get a mention in this month's blog post. There are just too many. Remember that you can give us a hint about who you think should receive a community reward. We try to award the bounties based on the contributions the member has done during the previous month. <https://komodoplatform.com/november-community-awards-a-new-foothold-in-asia/>

18th December 2019 - <https://help.liquid.com/en/articles/3579558-komodo-kmd-network-upgrade-december-2019>

19th December 2019 - Komodo Platform 101 <https://medium.com/tokyo-fintech/komodo-platform-101-7feff6a72bab>

27th December 2019 – Biweekly Update 13th December 2019 – 27th December 2019 on KomodoPlatform <https://medium.com/paradigm-fund/komodo-advancing-nspv-4bbae6b8f42>

7th January 2020 – AntPool Labs, one of the world's biggest mining pools, added KMD to their pool. You can now mine KMD on AntPool. For the launch period, which lasts from Jan 7 to Jan 19, the AntPool team has added some extra block rewards! <https://www.antpool.com/announcementDetail.htm?id=246>

December 2019 - Komodo upgrades the ecosystem to [v0.5.0 of the Komodo code base.](https://komodoplatform.com/komodo-to-activate-platform-wide-update/) <https://komodoplatform.com/komodo-to-activate-platform-wide-update/> (6th December 2019)

13th December 2019 - Friendly reminder that we will upgrade the Komodo code base to version 0.5.0, dubbed Obsidian Dragon on December 20, 2019, at block height 1670000. As a precaution, we have also advised all services and Exchanges to pause the deposits and withdrawals from Dec. 19th - 21st, 2019. **This is a mandatory platform upgrade, so all miners, exchanges, and individuals running full-seed nodes must update to the latest software before block 1670000. Those who do not update before December 20 will not run on the correct network.** All ecosystem Smart Chains (asset chains) will upgrade on Friday, December 20, 2019 11:06:40 AM UTC (timestamp: 1576840000) Wallets: Komodo OceanQT: <https://github.com/DeckerSU/KomodoOcean/releases/tag/v3.0.0-beta1-9979ca2> Komodod (core daemon): https://github.com/KomodoPlatform/komodo_releases/tag/0.5.0 Verus Agama: <https://github.com/VerusCoin/Agama/releases/tag/v0.6.0-1> Details about the Obsidian Dragon update https://komodoplatform.com/komodo-to-activate-platform-wide-update/?utm_source=Komodo+Main+Newsletter&utm_campaign=5959f75965-EMAIL_CAMPAIGN_Newsletter_2019_Dec_13&utm_medium=email&utm_term=0_ed5b384f14-5959f75965-589687121

21st December 2019 - The Komodo network upgrade to codebase version 0.5.0, dubbed Obsidian Dragon was successful! Please make sure to update your wallets/full-seed nodes to the latest version! Those who do not update will not run on the correct network!

31st December 2019 – The year has come to an end; we at Komodo take this moment to appreciate you being part of us. Happy New Year!

7th January 2020 - Excited to announce that Kadan (CTO) of @KomodoPlatform will be joining the other 50+ amazing speakers sharing their predictions and plans at CRYPTO 2020 Summit! Get your FREE ticket to this ONLINE conference <http://crypto2020summit.com>

13th January 2020 - The popular Crypto 101 Podcast is holding a free online conference called the CRYPTO 2020 Summit. Komodo Chief Technology Officer @ca333 will be speaking at the event, which takes place from Jan 29 to Jan 31, 2020. Tickets are free if you register online before January 23. <https://twitter.com/CRYPTO101Pod/status/1214688520616333312?s=20>

15th January 2020 – John Robinson (Project Liaison) spoke about atomic swaps and decentralized exchanges at Tokyo FinTech Meetup

20th January 2020 - **Komodo Community Portal Soft Launch** We are pleased to announce a territorial expansion for the Komodo community. Now, in addition to Discord, you can engage in discussions in a more forum-like environment. We believe Komodo has one of the most vibrant communities within the blockchain space, and the discussions on Discord are often insightful and inspiring. However, Discord is far from ideal as a platform for these conversations. Good threads often get lost after a day or two, and finding or archiving them is a nightmare. We believe the Komodo community deserves something better: our very own community portal. The Komodo Community Portal has entered a soft launch period, during which we invite our whole Discord community to try out the portal. Please send us your feedback, ideas, and feature requests. You can start using the portal. There won't be any "portal reset." The posts you create will be there also after we have officially launched on February 3rd. **Komodo Community Bounties** As some might have noticed, we haven't distributed December community bounties yet. We have saved those up to have a bigger bounty pool for January. We will announce the community award winners in early February. What you need to know is that we will assign a lot more weight for being active on the new Community Portal relative to other community contributions. We will also reward helpful feedback and other useful ideas about portal structure, feature requests, or so forth. Get active today, and stay tuned for the bounty announcement! Leave your portal feedback either - through a form: <https://forms.monday.com/forms/d0c9077d09acb254b8f1c73058f1012a> - publicly on the portal: board 'Casual Discussion,' tag your post with "Feedback." **Join the Komodo Community Portal:** <http://community.komodoplatform.com/> P.S. There is no need to promote the portal externally at this point. We are planning a full launch campaign for February 3rd. Let's focus on improving the portal experience, so everything is polished for the official launch.

21st January 2020 – Biweekly Update 7th January 2020 to 21st January 2020 on KomodoPlatform <https://medium.com/paradigm-fund/komodo-antara-framework-improving-upon-the-atomicdex-komodo-community-portal-soft-launch-531dbd3e0c53>

5th Feb 2020, We have added two new tasks to the bounty campaign! The prize pool has over 3000 \$KMD. Increase your chances of winning by completing these two new tasks. <https://gleam.io/voeqw/komodo-platform-community-portal-bounty>

4th Feb 2020, 2019 Annual Report: <https://komodoplatform.com/wp-content/uploads/2020/02/Komodo-2019-Annual-Report-Roadmap-Final.pdf>

7th Feb 2020, Weekly Report: <https://community.komodoplatform.com/post/5e3d639c94e508435a7dbcd>

14th Feb @everyone The Komodo bounty campaign has come to an end. Thanks to all who participated! We had more than 800 participants and 9400 entries. We will evaluate the results in the coming days and announce the winners on the Community Portal. Sign up to the portal here. <https://community.komodoplatform.com/>

14th Feb 2020, Weekly Report, <https://community.komodoplatform.com/post/5e46cc2d51fd8612511cfdf4>

31st Jan 2020 **@everyone pledge your support for a stronger Komodo community!** We are launching the new Komodo Community Portal on Monday, and here are a few of our goals we want to reach through the use of the portal: 1. **Accelerate community growth** by providing more value for the community as a whole and by easing the learning curve for all the newcomers. 2. **Build a culture of peer-to-peer community support** and start documenting all the valuable information into a growing knowledge base. 3. **Increase the adoption of Komodo technology** by building a stronger open-source developer community. 4. **Support the growth of the Komodo ecosystem** by bridging people and projects closer together. Please help us make the portal launch a success! Let us know how we can improve the portal experience and get closer to the objectives above. Send us your feature requests.

3rd Feb 2020, **Komodo Community Portal Launch Campaign** We are pleased to announce a territorial expansion for the Komodo community. Now, in addition to Discord, you can engage in discussions in a more forum-like environment. To spread the news far and wide, the Komodo team has launched a 10 day bounty campaign. <https://community.komodoplatform.com/post/5e386b525efbd74e99f304e5>

5th Feb 2020, dPoW Season 4 Notary Node Elections Season 4 Notary Node Election is coming. **If you are interested, please send in your proposal before the end of this month.** There is a link to Notary Node Bible at the end of the post where you should find all the required information as well. Feel free to ask any questions. <https://community.komodoplatform.com/post/5e3b133983b0f26f54b8d1e9>

10th Feb 2020, Biweekly Update 27th Jan—10th Feb 2020, <https://medium.com/paradigm-fund/komodo-2020-technical-roadmap-2019-annual-report-fourth-annual-notary-node-election-bef7980afe19>

February 2020 - Komodo announces a [decentralized, collateralized stable-coin solution](#).
<https://komodoplatform.com/decentralized-stablecoin-solution/> (11th Feb 2020)

13th Feb 2020, [@everyone](#) We are thrilled to announce that Charles "@PTYX" Gonzales joins the Komodo Team as a Business Developer. Charles is a well-known person within the Komodo community and, for many community members, needs no introduction. Just in case you're not familiar with him yet or want to learn more, you can check out his introduction post that you can find in the community portal. We imagine this announcement raises some curiosity and general interest within the community, and we thus decided to conduct a brief interview with him to clear some things up. Read more here. <https://community.komodoplatform.com/post/5e451ac5aa8fa03291e05b22>

14th Feb 2020, [@everyone](#) **Komodo Community Bounty Awards - January 2020** Now that it's 2020, it is time to kick off this year's first round of community bounty awards. We are distributing 3000 KMD to handpicked members of the community. We will distribute an additional 3000 KMD through the Community Portal launch campaign. The winners of that campaign will be announced next week. *Continue reading on the Komodo Community Portal* <https://community.komodoplatform.com/post/5e46a41c4af52150b2082577>

15th Feb 2020, Antara Prices Module Documentation Now Live <https://community.komodoplatform.com/post/5e484d624e46b73109bb5c27>

16th Feb 2020, Friendly reminder that the Komodo Developer Hangout Livestream about AtomicDEX will start today at 18:00 UTC. The Livestream will be on Komodo's official YouTube channel. <https://www.youtube.com/channel/UCtp7YrrEnZbW97sgPldyvKg> See @ca333 post on the community portal for more information. <https://community.komodoplatform.com/post/5e46de21312e7f1d9977ea3b>

16th Feb 2020, <https://www.youtube.com/channel/UCtp7YrrEnZbW97sgPldyvKg/live> several members of the Komodo Dev Team will be holding a livestream for developers that covers updates on the AtomicDEX enduser products. The stream will discuss the general architecture and design of AtomicDEX, the incredible level of security it offers, and the progress that's being made on the Desktop GUI

21st Feb 2020, Weekly Update <https://community.komodoplatform.com/post/5e5002cc66df80085ca243b9>

19th Feb 2020, We want to thank everyone who participated in the Komodo Community Portal Launch **#bounty** campaign. We had over 500 participants and 9400 entries. <https://community.komodoplatform.com/post/5e4d63978edce31e14daf97d> <https://twitter.com/KomodoPlatform/status/1230181235814813698>

21st Feb 2020, Four years ago, on February 21, 2016, James 'jl777' Lee published an open letter to state the need for multi-chain architecture and to announce an open atomic swap **#protocol**. Now, @KomodoPlatform offers both. **#BTC#KMD #atomicswaps** Read more here. <https://komodoplatform.com/komodo-platform-a-commitment-to-innovation/>

27th Feb-12th March 2020, <https://community.komodoplatform.com/post/5e6f49b9d8af741bbecb2a17>

10th March 2020 (postponed), Only 6 days left until the Notary Node Elections 2020. Those who would like to run in the 2020 Notary Node Election must announce their candidacy by 12:00 UTC on March 16, 2020. Read more here. <https://komodoplatform.com/fourth-annual-notary-node-election/>

16th March 2020, ca333 posted: "In the last few days, we carefully evaluated the current situation around the COVID-19 pandemic. Considering the scale of damage it is causing around the world, including traditional and crypto markets, we decided to postpone the proposal deadline and the election end-date by 4 weeks. Auto-elected spots get announced on April 12th with the cutoff time being April 12th 2020, 12pm UTC. The new deadline to submit proposals is April 13, 12:00 UTC. And the election ends on May 4th 2020, 12:00 UTC We will re-asses the situation 14 days from now and we will keep you updated on any changes. Running a Notary Node is a complex task and we believe this time can now be better used for preparation for the pandemic and taking care of your loved ones. Stay safe, everyone. source: <https://github.com/KomodoPlatform/dPoW/blob/master/doc/bible.md#important-dates-for-season-4>"

16th March 2020, Considering the COVID19 situation, we are postponing the **\$KMD** Notary Node Elections by 4 weeks. Running a Notary Node is a complex task and the time can now be better used for preparation. The new deadline to submit proposals is April 13, 12:00 UTC. <https://community.komodoplatform.com/post/5e6f49b9d8af741bbecb2a17>

Weekly Update - March 20, 2020 What happened this week? There was a Cointelegraph article, and we unraveled bunch more posts about our 'blockchain fundamental' series. We also created a new whiteboard video comparing Antara Modules to smart contracts. Read the full update from our Komodo Community Portal. <https://community.komodoplatform.com/post/5e74a8eee6a2ab714e99e483>

25th March 2020, Biweekly Report 12th-25th March 2020 <https://medium.com/paradigm-fund/komodo-the-fourth-annual-notary-node-election-postponed-blockchain-fundamentals-series-antara-779d117dec2f>

Weekly Update - March 27, 2020 It's Friday again, which means it's time for another weekly wrap-up. This week, Ethereum Founder Vitalik Buterin took notice of AtomicDEX on Twitter, Komodo CTO Kadan Stadelmann joined a podcast with Justin O'Connell from Cryptographic Asset, and more. Read the weekly update here. <https://community.komodoplatform.com/post/5e7e120ca72ecf1cdcfabc41>

3rd April 2020, **Komodo's Monthly Report for March 2020 is here** Another month has passed, and we've summarized the most important events of the last month. <https://twitter.com/KomodoPlatform/status/1246045342421979136?s=20>
